ORTORAMA

DIALOGUES ON URBAN GARDENING:
PRACTICES, PLACES, PEOPLE

September 23rd and 24th, 2022

Torino Urban Lab, Piazza Palazzo di Città 8/F

ORTORAMA presents urban agriculture as a multi-dimensional phenomenon and, thanks to the heterogeneity that distinguishes it, increasingly central to the current urban scenario.

The aim of the event is twofold. First, to represent the variety of practices and purposes that characterize urban agriculture through the testimony of practitioners and organizations implementing some of the most exciting projects at the Italian and European levels. In addition, ORTORAMA promotes a collective dialogue to build a joint reflection on the generative potential of urban gardens, highlighting the broad implications of the phenomenon because of the value that distinguishes each case.

The event consists of four thematic sessions built in round table mode. ORTORAMA collects the invitation of Terra Madre 2022 to reflect on the topic of *regeneration* and proposes the urban garden as a strategic device for this purpose. Inviting to Turin representatives of Italian and European associations and projects, ORME ETS, in collaboration with Torino Urban Lab, act as the promoter of an idea of urban agriculture as a plural phenomenon and that, precisely because of these differences, can be recognized as the protagonist of today's cities and as an essential component for the design of our urban, food and social future.
